SKILLS

- Unit testing
- Selenium
- Front end development
- Back end development
- Agile methodology
- High-level numerical literacy
- Strong time management
- Strong Communication

SUMMARY

Web developer with completion of web development bootcamp at Coder Academy and a completed internship at Law Partners. Knowledgeable of C#, .NET framework, MVVM and MVC architecture, JavaScript, React, Express, Ruby and Ruby on Rails. Well-versed at producing efficient code with a solid understanding of unit testing and test driven development. Eager to further increase my skill set to become a more efficient developer.

KEY PROJECTS

PORTFOLIO WEBSITE

https://chrisback2021.github.io/T1A2/

- First project built using HTML and CSS.
- Built with mobile-first design hence responsive at 3 different breakpoints.
- Flexbox used to change layout depending on screen size.

MOVIEFINDER

https://my-movie-app.azurewebsites.net/

- Full-stack app creating using C#, ASP.NET Core and used Azure for database and deployment. Also connected to PayPal API for payment.
- Can insert and retrieve images from a file system, which has location stored on database.
- Role-based authorization and authentication added. CRUD functionality only available for admin role.
- Please click here for README document to access admin account for CRUD functionality and PayPal sandbox account.

CHRIS' BLOG

https://fs-blog-three.vercel.app/

- Blog created using MERN stack.
- User can only edit/delete their own posts.
- Custom CSS and also connected to Cloudinary to save images. Can view blog posts via categories on the right side.

EDUCATION

DIPLOMA OF IT

2022

Coder Academy - Web development bootcamp

BACHELOR OF BUSINESS

2018

University of Technology, Sydney

EMPLOYMENT HISTORY

UBER EATS DELIVERY

Delivery Driver   Feb 2022 - Current

- Maintain good work ethic by ensuring relations were strong through verbal and non-verbal communication with both customers and store workers.

- Maintained a functional vehicle by conducting preventive maintenance, which improved efficiency and resulted in no cancelled deliveries.

- Solved delays arising during deliveries by communicating with customers via phone call and text messages.

LAW PARTNERS

Graduate Support Developer(Internship)   Aug 2022 - Nov 2022

- Fix bug tickets that have been allocated to our team.

- Supported team members when needed, such as providing extra information to our QA team and closely working with developers to fix bugs.

- Created a knowledge base to differentiate the duties between level 1 support and level 2 support to allow developers to focus on fixing code issues.

- Participate in team scrum every morning to advise on what I have been working on and provide any assistance I can to others or ask for assistance.

- Communicate with users to find out causes of errors and replicate them in our local environment to pinpoint the error and include the reproduction steps into Azure for other developers to see.

OMNICOM MEDIA GROUP

Media Payables Officer   Feb 2019 - Jan 2022

- Matching, validating and reconciling media supplier invoices with our system (Spectra MD).

- Managed over 100 accounts every month over various media types, including digital, overseas and radio.

- Working closely with our media team to ensure all account queries are resolved prior to when the media supplier must be paid.

- Ensure all electronic scanning and filing is complete every month to ensure we have back up records of our payments and invoices we have received.

- Maintain strong relations with our external vendors, internal teams and other finance divisions and management to ensure smooth communication on all levels.
